The screenshot shows an IDE interface with several panes:

- Left pane (Project View):** Shows a file tree with packages like Hooks, LoginStepDefs, TRANS_537stepDefs, utilities, resources, and features. Under features, there are three files: addevent.feature, LastOdometer.feature, and login.ddt.feature.
- Middle pane (Code Editor):** Displays Java code related to user authentication and configuration reading.
- Bottom Left (Git Log):** A context menu is open over the 'Local' branch 'TRANS-536'. The menu items include: Checkout, New Branch from Selected..., Checkout and Rebase onto Current, Compare with Current, Show Diff with Working Tree, **Rebase Current onto Selected** (which is highlighted with a blue background), Merge into Current, and Update.
- Bottom Right (Commit History):** A table showing commit history for the 'origin & master' branch. The commits listed are:

Commit Message	Author	Date
added compulsory field	SAkkaya	17 minutes ago

```
        }

    public WebElement getActualCellName(String dataColumns){
        String columns = "columns";
        return driver.findElement(By.xpath("//td[" + columns + "]"));
    }

    public void filterData(String dataColumns) {
        new WebDriverWait(driver, 10).until(ExpectedConditions.visibilityOfElementLocated(By.xpath("//input[@placeholder='Search']")));
        new WebDriverWait(driver, 10).until(ExpectedConditions.elementToBeClickable(By.xpath("//input[@placeholder='Search']")));
        new FleetVehiclePage().getSearchInput().sendKeys(dataColumns);
        new FleetVehiclePage().getSearchButton().click();
        new FleetVehiclePage().getColumnsFilterAll(dataColumns).click();
    }
}
```

A GitHub pull request merge dialog is displayed over the code editor. The dialog shows two options:

- Merge incoming changes into the current branch
- Rebase the current branch on top of incoming changes

Buttons at the bottom of the dialog include: **OK**, **Cancel**, and **Don't show again**.

The GitHub interface at the bottom shows a repository named **TRANS 537** with a green **origin & master** status, last updated **Yesterday 12:21 AM**.

The screenshot shows the IntelliJ IDEA interface with the following details:

- File Menu:** File, Edit, View, Navigate, Code, Analyze, Refactor, Build, Run, Tools, Git, Window, Help.
- Project Bar:** AddEventFeature, src, test, java, com, translantik, stepDefs, LoginStepDefs.java.
- Editor:** The code for `LoginStepDefs.java` is displayed. It contains logic for logging in users based on their type (sales manager, driver, store manager) using configuration reader values. A red circle highlights the "Commit..." button in the top right corner of the editor.
- Git Panel:** Shows the local repository structure with branches Local (master, TRANS-536), Remote (origin, master, Murat_Harun), and a commit history. The commit history includes:
 - HEAD (Current Branch)
 - Local
 - TRANS-536 (selected)
 - added compulsory field (SAkkaya, 18 minutes ago)

AllCarsStepDefs.java file added for TRANS-530 User Story Galip İrice*

The screenshot shows a Java code editor with a commit dialog open. The commit message is "theUserLoggedInAs". The code implements a switch statement based on user type (sales manager, driver, store manager) to set login credentials. A red circle highlights the commit dialog in the top-left corner. The bottom half of the screen displays a Git log showing a merge from 'origin/master' into the local 'master' branch, with a commit for 'AllCarsStepDefs.java' added for 'TRANS-530 User Story'. The commit message in the log is "Galip İrice*".

```
public void theUserLoggedInAs(String userType){  
    String username = "", password = "";  
  
    switch (userType){  
        case "sales manager" :  
            username = ConfigurationReader.get("SalesManagerUsername");  
            password = ConfigurationReader.get("SalesManagerPassword");  
            break ;  
        case "driver" :  
            username = ConfigurationReader.get("DriverUsername");  
            password = ConfigurationReader.get("DriverPassword");  
            break;  
        case "store manager" :  
            username = ConfigurationReader.get("StoreManagerUsername");  
            password = ConfigurationReader.get("StoreManagerPassword");  
            break;  
  
        default:  
            System.out.println("UNKNOWN USER TYPE");  
    }  
  
    LoginPage loginPage = new LoginPage();  
    loginPage.login(username, password);  
}
```

TRANS-536 Last Odometer filtering feature

Commit Commit and Push...

Messages: Code Analysis ×

- > 🐛 C:\Users\PC\IdeaProjects\AddEventFeature\src\test\resources\features\TRANS-537.feature
- > 📄 C:\Users\PC\IdeaProjects\AddEventFeature\src\test\java\com\translantik\pages\FleetVehiclePage.java

```
password = ConfigurationReader.get("driver_password");
break;
case "driver" :
username = ConfigurationReader.get("driver_username");
password = ConfigurationReader.get("driver_password");
break;
case "store manager" :
username = ConfigurationReader.get("store_manager_username");
password = ConfigurationReader.get("store_manager_password");
break;
```

The screenshot shows a Java code editor with a commit dialog open. The code in the editor is a step definition for a Cucumber feature, specifically for logging in a user. The commit dialog at the bottom left contains the commit message "TRANS-536 Last Odometer filtering feature". Below the message are two buttons: "Commit" and "Commit and Push...". The "Commit and Push..." button is highlighted with a red circle. The Git log at the bottom shows a local commit for branch "TRANS-536" made by "mehmet soylu" a minute ago, which added compulsory fields and a third feature. It also lists a merge from the remote tracking branch "origin/master" and a GitHub collaboration note.

```
LoginPage loginPage = new LoginPage();
loginPage.login(username, password);

}

@When("the user logged in as {string}")
public void theUserLoggedInAs(String userType) {
    String username = "", password="";
    switch (userType){
        case "sales manager" :
            username = ConfigurationReader.get("sales_manager_username");
            password = ConfigurationReader.get("sales_manager_password");
            break ;
        case "driver" :
            username = ConfigurationReader.get("driver_username");
            password = ConfigurationReader.get("driver_password");
            break;
        case "store manager" :
            username = ConfigurationReader.get("store_manager_username");
            password = ConfigurationReader.get("store_manager_password");
            break;
        default:
            System.out.println("UNKNOWN USER TYPE!!!");

    }
}

LoginPage loginPage = new LoginPage();
```

The screenshot shows a GitHub repository page for the user Sakkaya. The repository name is Sakkaya / AddEventFeature. The top navigation bar includes links for Pull requests, Issues, Marketplace, and Explore. On the right side of the header are Unwatch (2), Star (1), and Fork (F) buttons.

The main navigation tabs are Code, Issues, Pull requests, Actions, Projects, Wiki, Security, Insights, and Settings. The Code tab is selected, indicated by a red underline.

The page displays a navigation bar with tabs: Overview, Yours, Active, Stale, and All branches. A search bar for branches is also present.

The Default branch section shows the master branch, which was updated 30 minutes ago by Sakkaya. It has a status of Default and edit and delete icons.

The Active branches section, highlighted with a red oval, lists two branches:

- TRANS-536, updated 30 minutes ago by mehmetsoylu38. It has 0 | 1 merge status and edit and delete icons.
- Murat_Harun, updated 2 days ago by Sakkaya. It has 3 | 0 merge status and edit and delete icons.

To the right of the active branches, there is a "New pull request" button, also highlighted with a red oval. Below it are two more "New pull request" buttons with edit and delete icons.

At the bottom of the page, there are links for © 2021 GitHub, Inc., Terms, Privacy, Security, Status, Docs, Contact GitHub, Pricing, API, Training, Blog, and About.

Screenshot of a GitHub pull request creation interface. The top navigation bar includes Issues, Pull requests, Actions, Projects, Wiki, Security, Insights, and Settings. The main title is "Open a pull request". A sub-instruction says "Create a new pull request by comparing changes across two branches. If you need to, you can also [compare across forks](#)".

The pull request details are as follows:

- base: master
- compare: TRANS-536
- Status: Able to merge. These branches can be automatically merged.

The pull request title is "TRANS-536 Last Odometer filtering feature".

Reviewers:

- harunozarslan (Request)
- galibabi (Request)

Footnote:

Remember, contributions to this repository should follow our [GitHub Community Guidelines](#).

A large red oval highlights the title input field and the "Create pull request" button.

Open a pull request

Create a new pull request by comparing changes across two branches. If you need to, you can also [compare across forks](#).

The screenshot shows the GitHub interface for creating a pull request. At the top, it says "base: master" and "compare: TRANS-536". A green checkmark indicates "Able to merge. These branches can be automatically merged." Below this, there's a title "TRANS-536 Last Odometer filtering feature" and tabs for "Write" and "Preview". The "Write" tab is active. There's a rich text editor toolbar above a comment input field. The right side of the screen contains several configuration sections:

- Reviewers**: Shows "BerkTurkucu" with a gear icon. A red oval highlights this section.
- Assignees**: Shows "SAkkaya" with a gear icon. Another red oval highlights this section.
- Labels**: Shows "None yet" with a gear icon.
- Projects**: Shows "None yet" with a gear icon.
- Milestone**: Shows "No milestone" with a gear icon.
- Linked issues**: Shows "Use Closing keywords in the description to automatically close issues" with an info icon.

At the bottom left, there's a note: "Remember, contributions to this repository should follow our [GitHub Community Guidelines](#)". A large green "Create pull request" button is at the bottom right.

A screenshot of a Java code editor interface, likely IntelliJ IDEA, showing a file named `StepDefs.java`. The code defines a step definition for logging in a user based on their type (sales manager, driver, store manager). A red circle highlights the top right corner of the window, where a context menu is open. The menu items shown are `Create Pull Request...` and `Alt+Insert`.

TODO Problems Terminal Build Dependencies Event Log

The screenshot shows an IDE interface with the following details:

- File Path:** AddEventFeature > src > test > resources > features > TRANS-537.feature
- Pull Requests:** A list of pull requests is shown, with the first one highlighted by a red circle: "commit Trans536 Odometer Feature #6 mehmetsoylu38 on 8/25/2021".
- Code Editor:** The main editor area displays a feature file named TRANS-537.feature. It contains a scenario outline and step definitions. A large red circle highlights the step definition section:

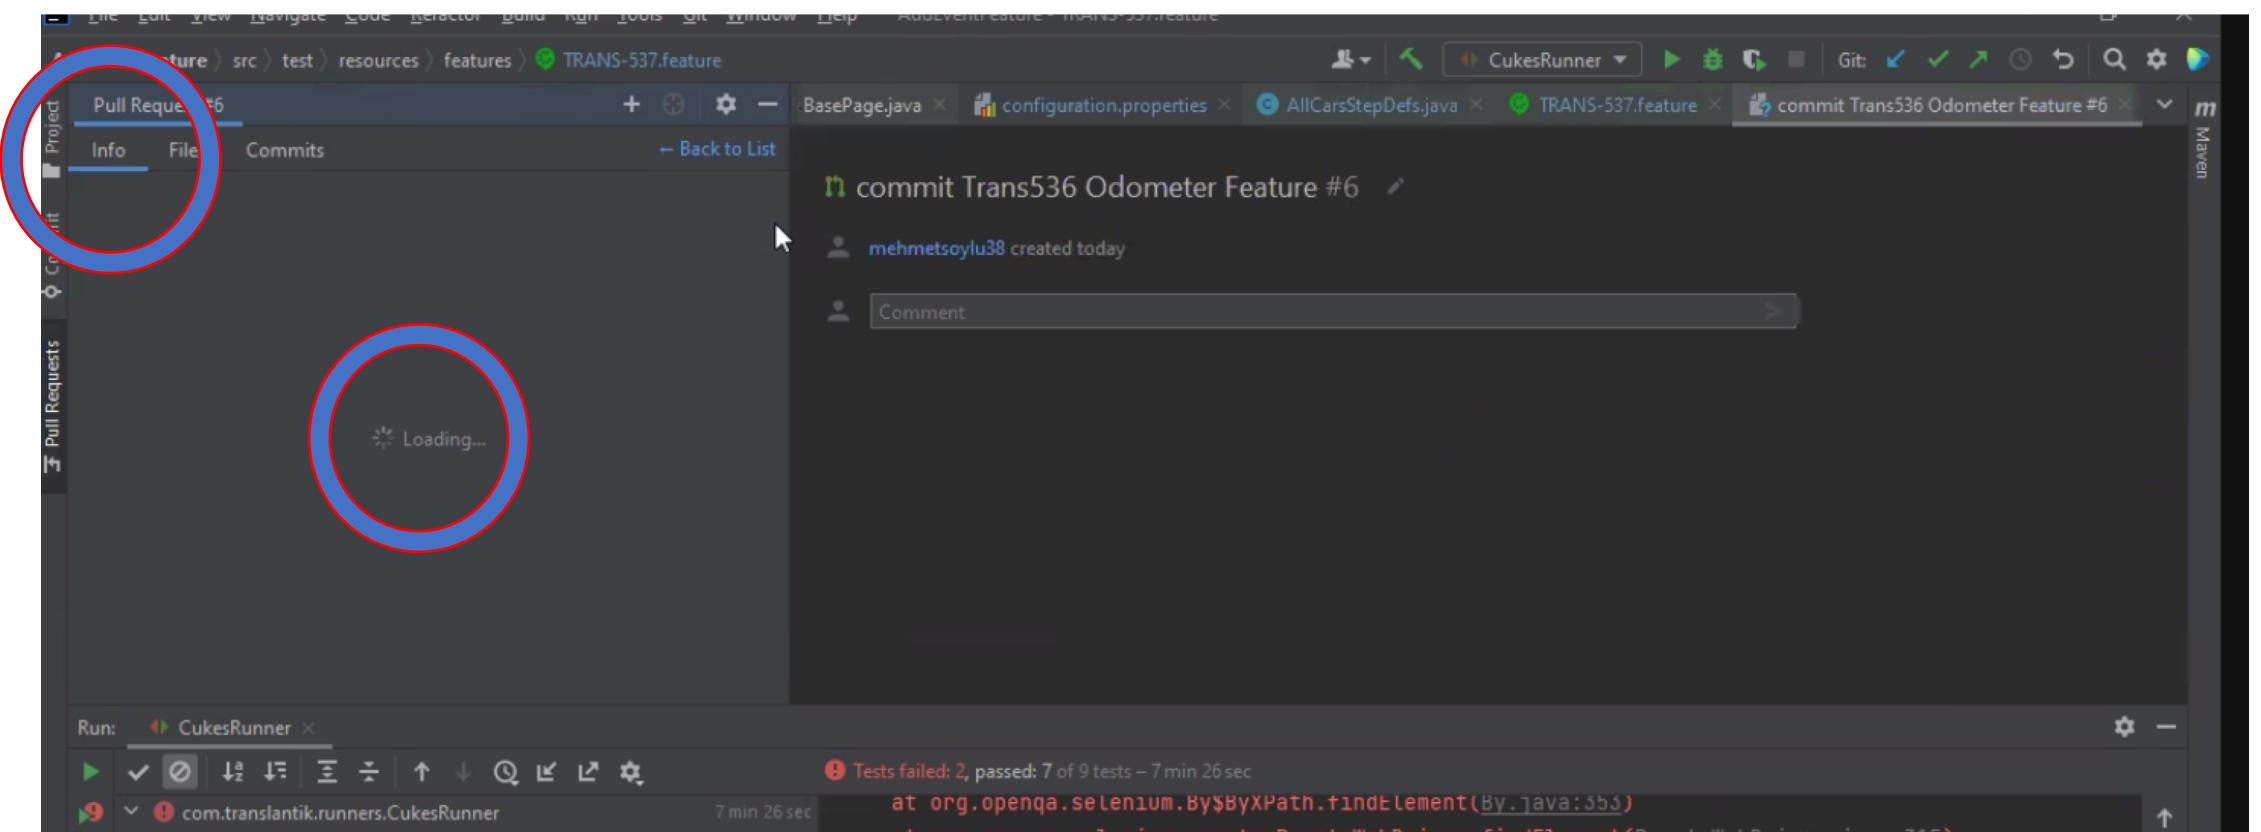

```
Given The user is on the Vehicles Pages
# And the user click manage filters and select "Driver" checkbox
# When the user select filter <method>
# And write "John Doe" into input box
# And click on update button
# Then table should displays corresponding "data" related to selected method
```
- Run Tab:** The "Run" tab shows the execution results for "CukesRunner". A red circle highlights the failed test results:
 - Total tests: 9
 - Failed: 2
 - Passed: 7

Details for failed tests:

 - com.translantik.runners.CukesRunner
 - Last Odometer
 - Last Odometer Between Filtering
 - Last Odometer Between Filtering

Failure details for the last Odometer Between Filtering test:

```
Tests failed: 2, passed: 7 of 9 tests - 7 min 26 sec

The screenshot shows a Java-based application running in an IDE, specifically IntelliJ IDEA. The main window displays a pull request titled "Pull Request #6" for a file named "TRANS-537.feature". The left sidebar shows the project structure with files like "AddEventFeature.java", "FleetVehiclePage.java", "AllCarsStepDefs.java", "LastOdometer.feature", and "TRANS-537.feature". The right side of the interface is a "Diff for Pull Request #6" viewer, comparing the current state (9f79fb0) with the previous commit (4fc4bf5). The diff highlights changes in the "examples" section of the feature file, showing additions and deletions of step definitions like "method", "contains", "does not contain", "starts with", "ends with", and "is Equal". A red circle highlights the "Info" tab in the top navigation bar, and a large blue oval highlights the code comparison area.

The screenshot shows a GitHub Pull Request diff interface in a code editor. The top navigation bar includes File, Edit, View, Insert, Refactor, Build, Run, Tools, Git, Window, Help, and a tab for 'AddEventFeature - Diff for Pull Request #6'. Below the navigation is a toolbar with icons for CukesRunner, Git, and other repository details. The main area displays a side-by-side comparison of two commits, both titled 'TRANS-536 Last Odometer filtering feature'. The left commit is labeled '9f79fb0' and the right is '4fc4bf5'. The code editor shows Java code with annotations like @FindBy and public WebElement. The bottom of the interface features a 'Submit Review...' button and a file tree showing 'src\test' with files like 'AllCarsStepDefs.java', 'LastOdometer.feature', and 'TRANS-537.feature'.

The screenshot shows a GitHub pull request interface for a file named `TRANS-537.feature`. The code editor on the left displays a feature scenario with examples and steps involving filters and locations. A floating review interface is overlaid on the right, titled "Finish your review". It includes a toolbar with "Write", "Preview", and rich text editing icons, and a "Leave a comment" text area. Two red circles highlight specific elements: one circle surrounds the "Review changes" button at the top right of the review panel, and another circle surrounds the "Comment" radio button and its description below it.

The screenshot shows a GitHub repository page for 'Sakkaya / AddEventFeature'. The 'Code' tab is selected. At the top, there are links for Unwatch (2), Star (1), and settings. Below the navigation bar are tabs for Overview, Yours, Active, Stale, and All branches, with 'Overview' being active. A search bar for branches is also present. The main content area shows the 'Default branch' with a commit from 'BerkTurkucu'. Below it is a section for 'Active branches' containing a commit from 'mehmetsoylu38' and a deleted branch named 'Murat_Harun'. To the right, a detailed view of pull request '#6' is shown, which has been merged. The pull request card includes a 'Restore' button. Two specific sections are circled with red ovals: the 'Active branches' list and the pull request details for '#6'.

About

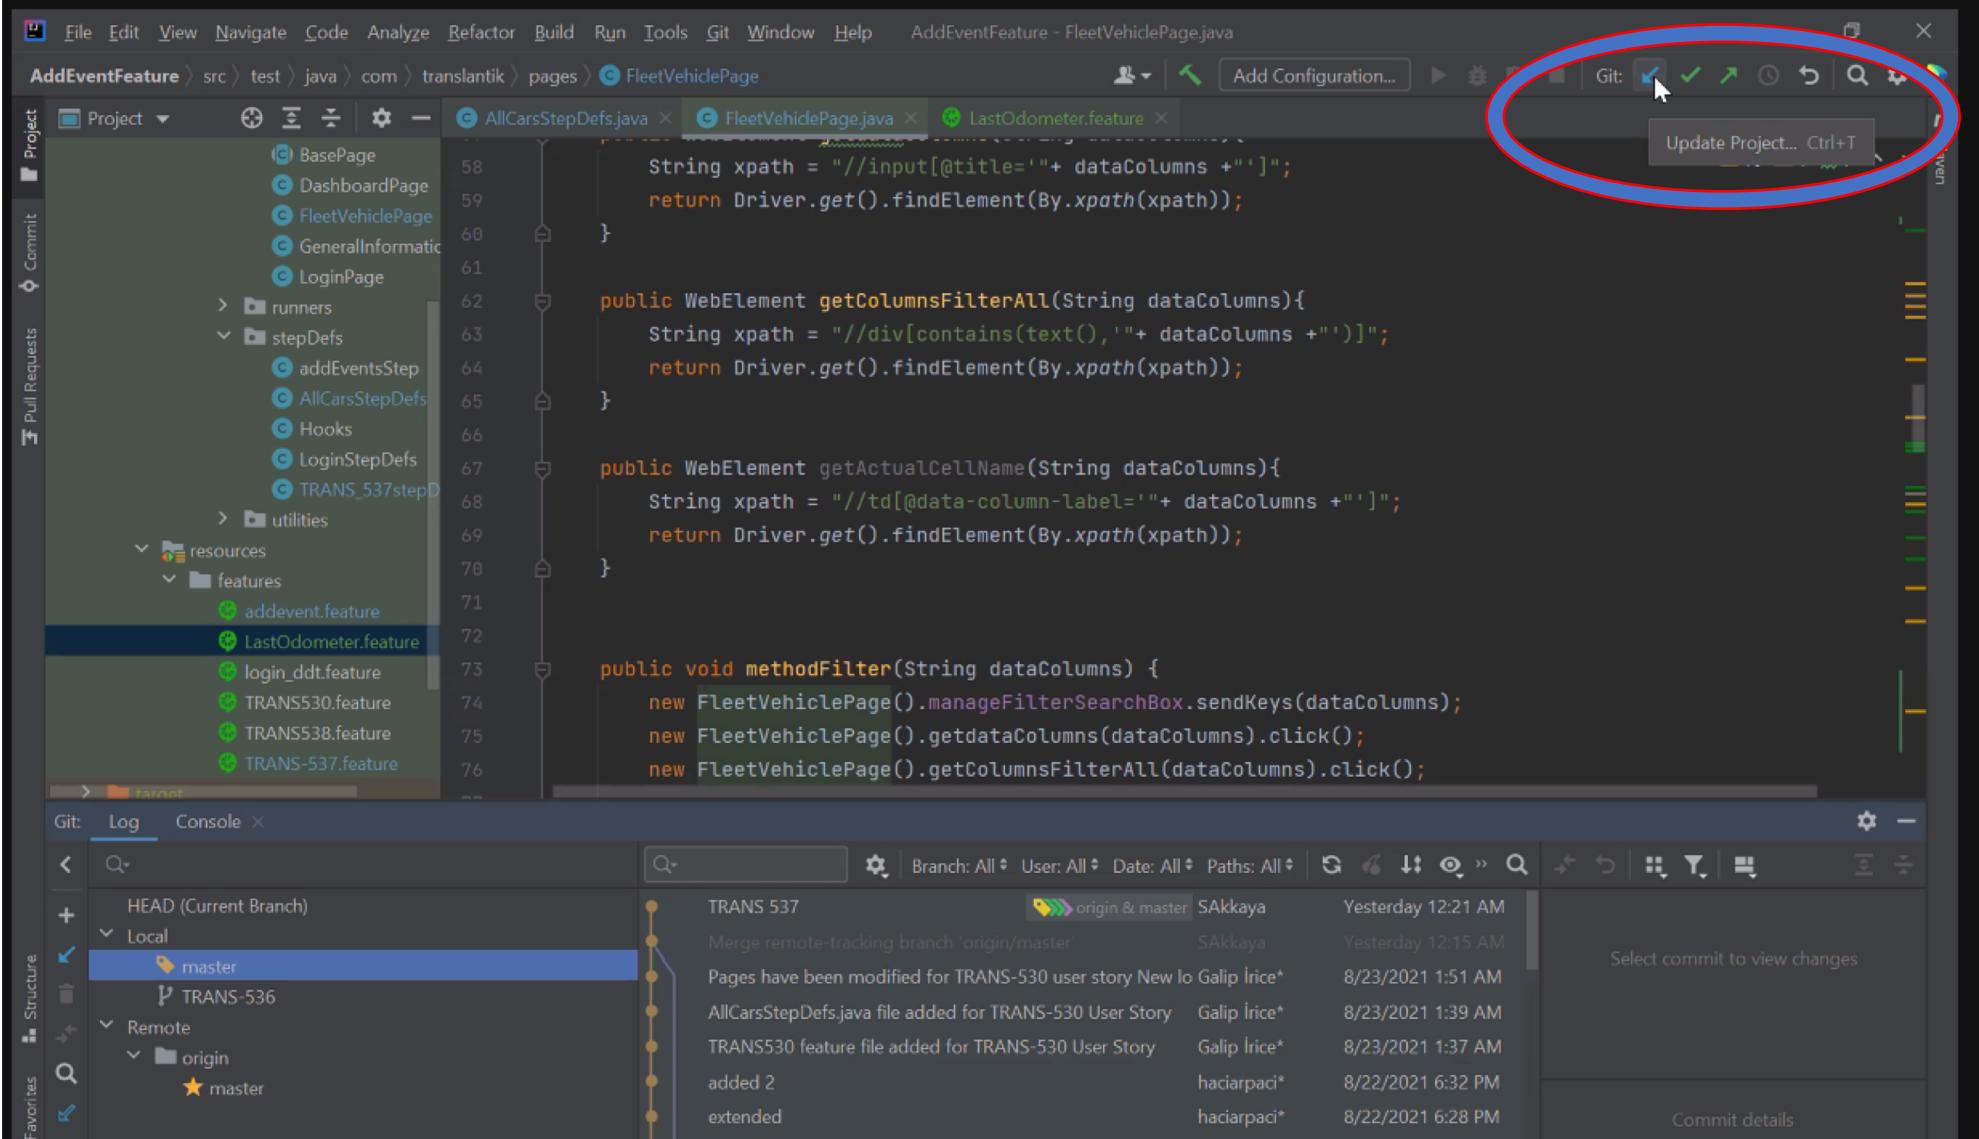

```
<method>
input box

corresponding "data" related to selected method
```

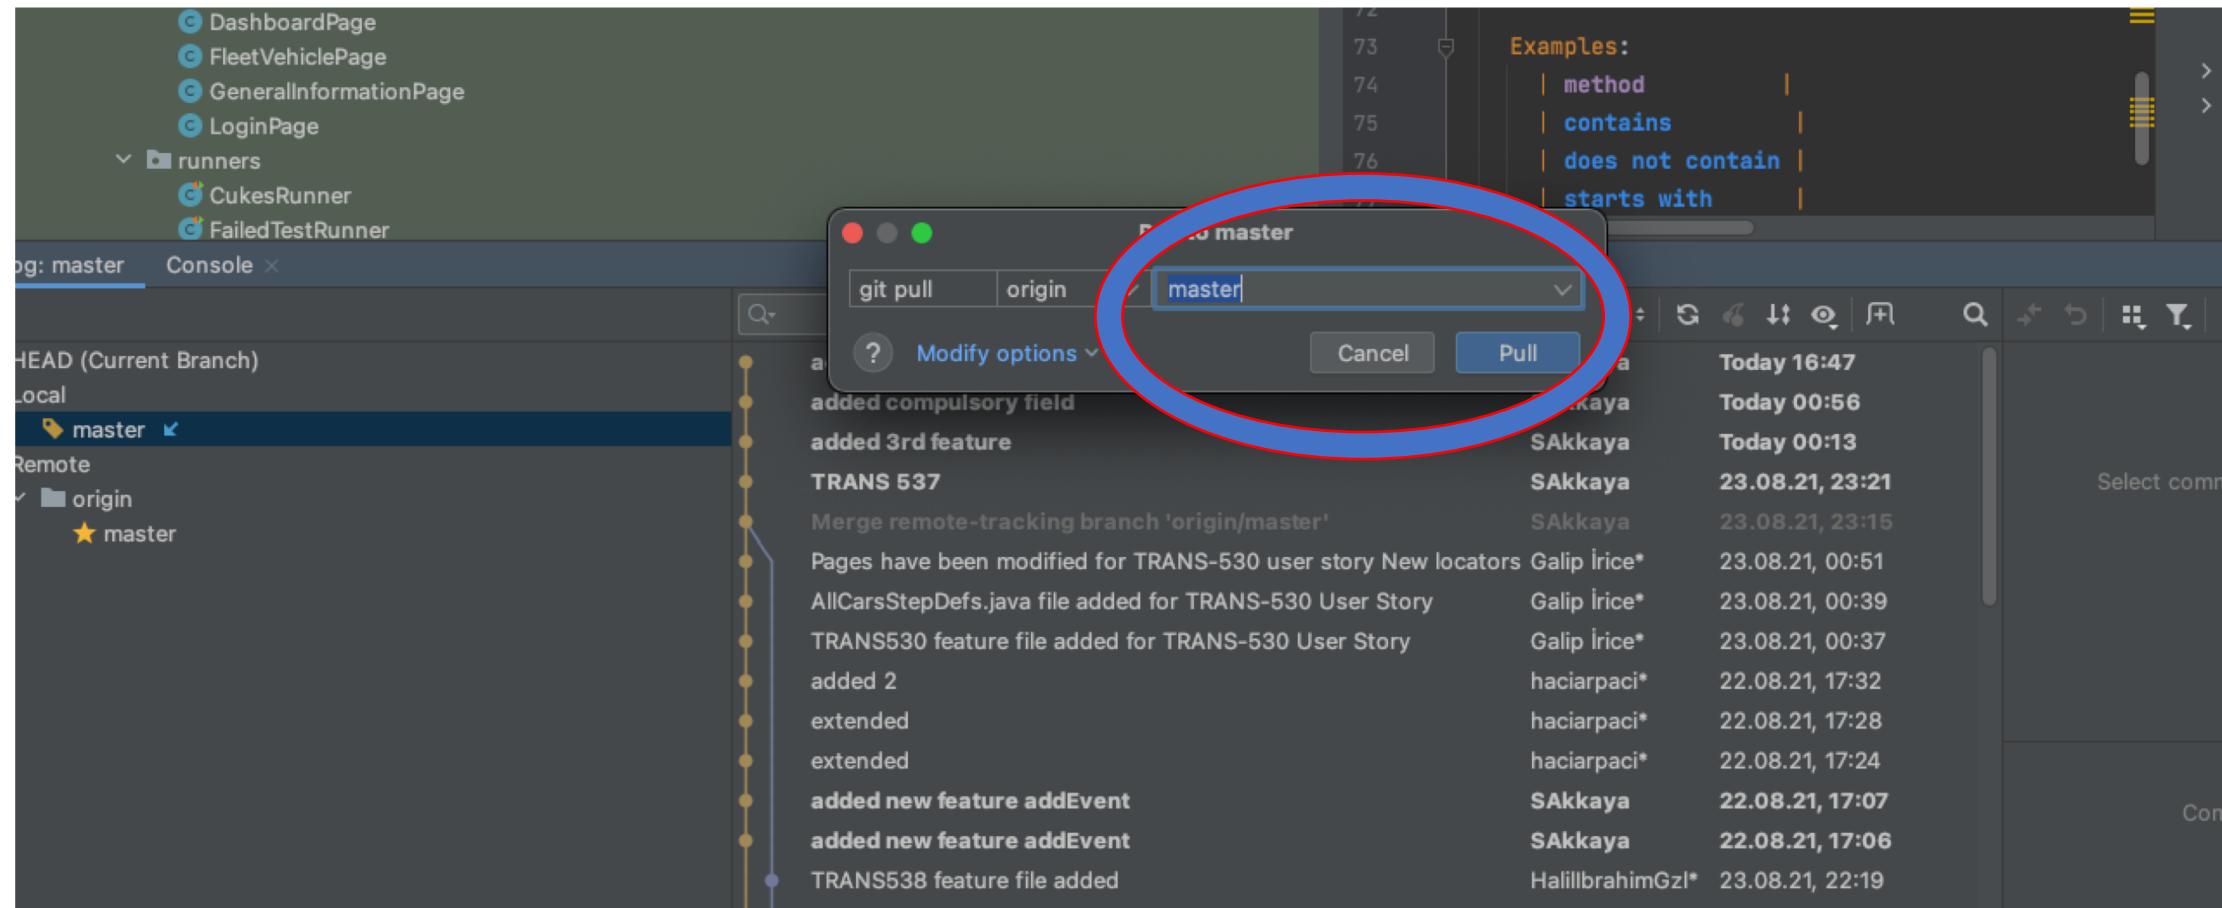

The screenshot shows a terminal window with a dark background. At the top, there is a green header bar containing the text: '<method>', 'input box', and 'corresponding "data" related to selected method'. In the bottom right corner, there is a message box with a blue border and white text that says 'Fetch Successful' with an information icon. This message is circled with a red oval. At the very bottom of the window, there is a status bar with several pieces of information: '68:21 LF UTF-8 2 spaces', a small icon, 'master', '521 of 1024M', and a green circle with the number '2' next to the text 'Event Log'.

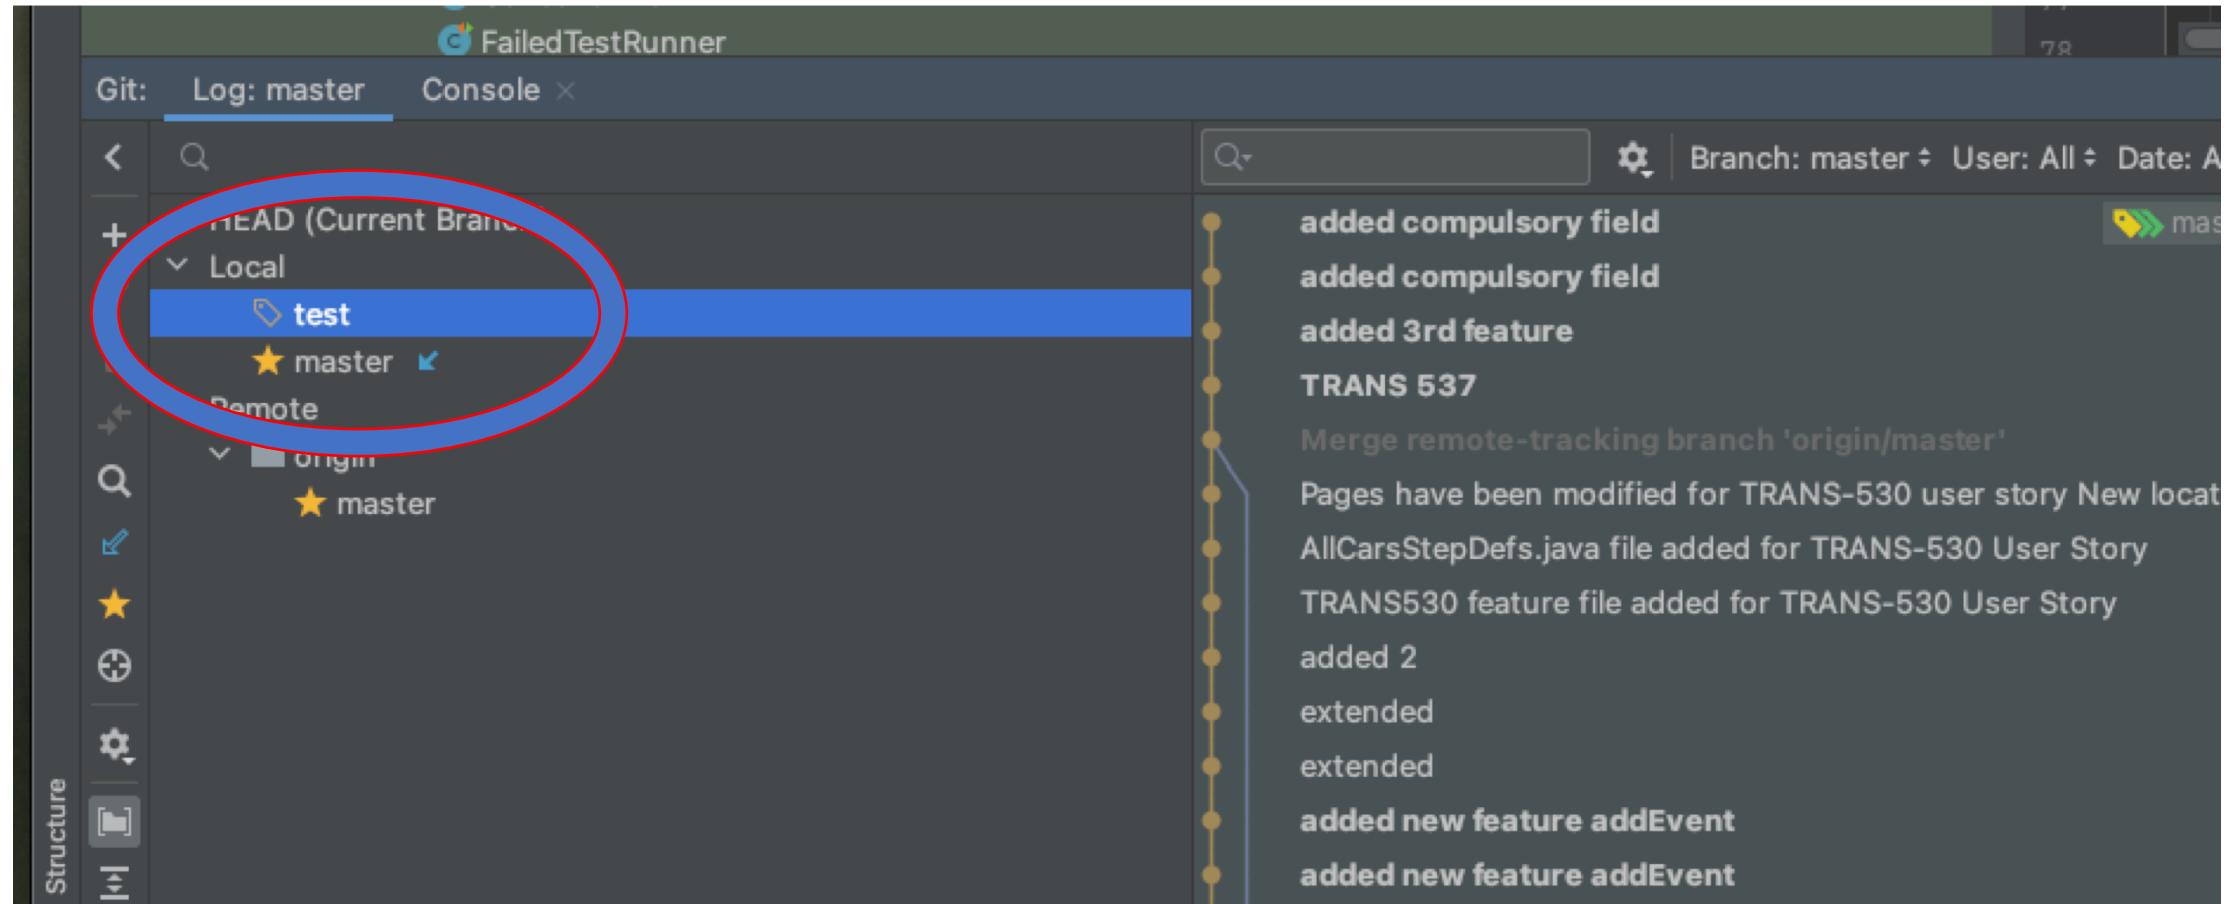

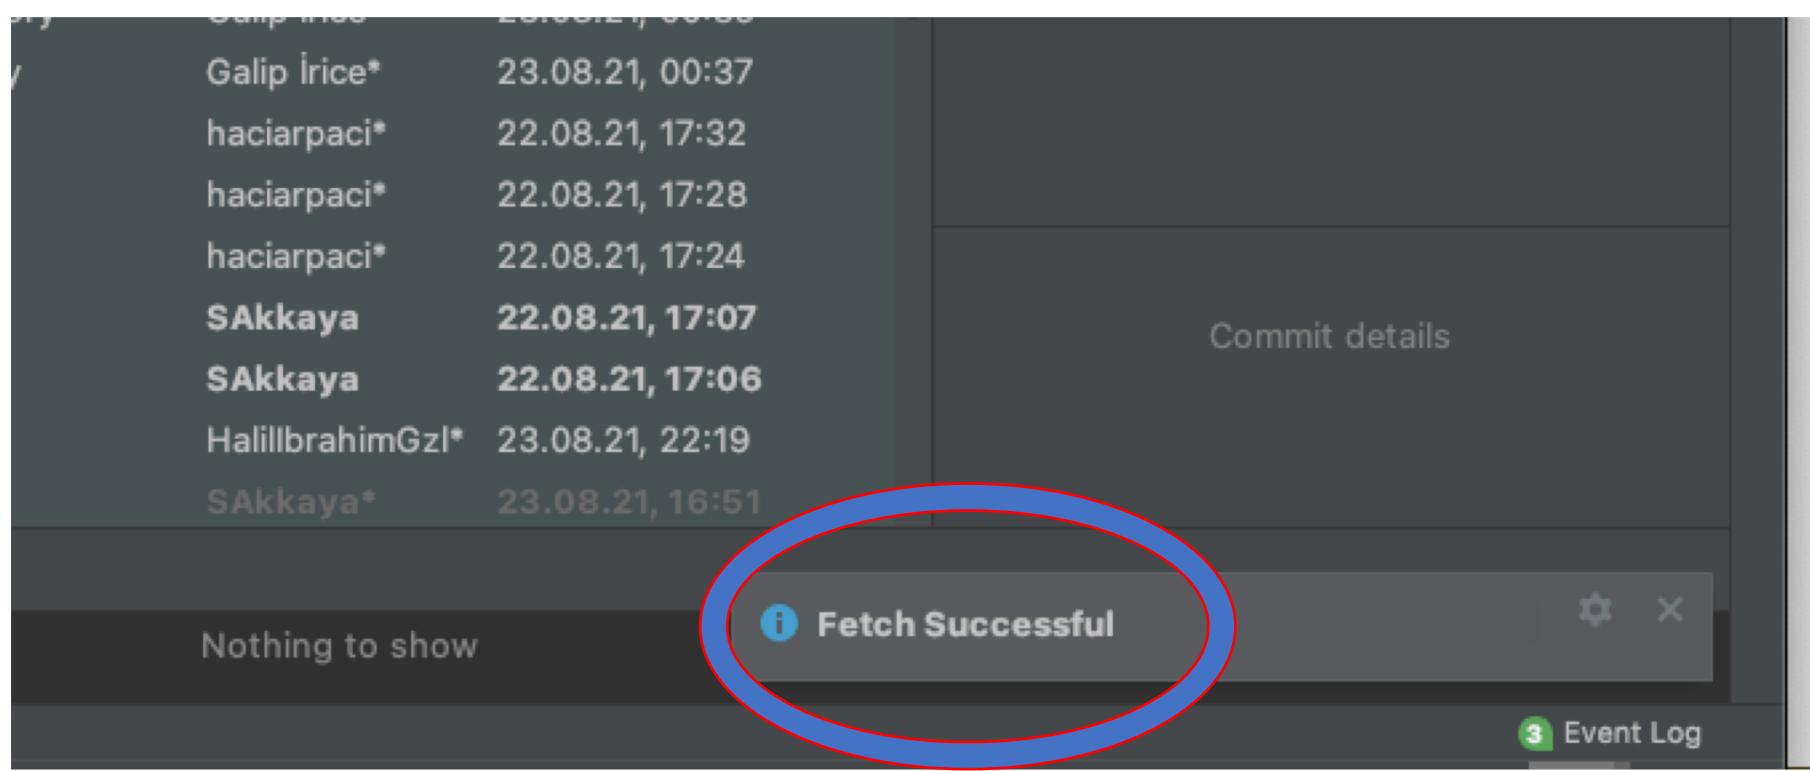

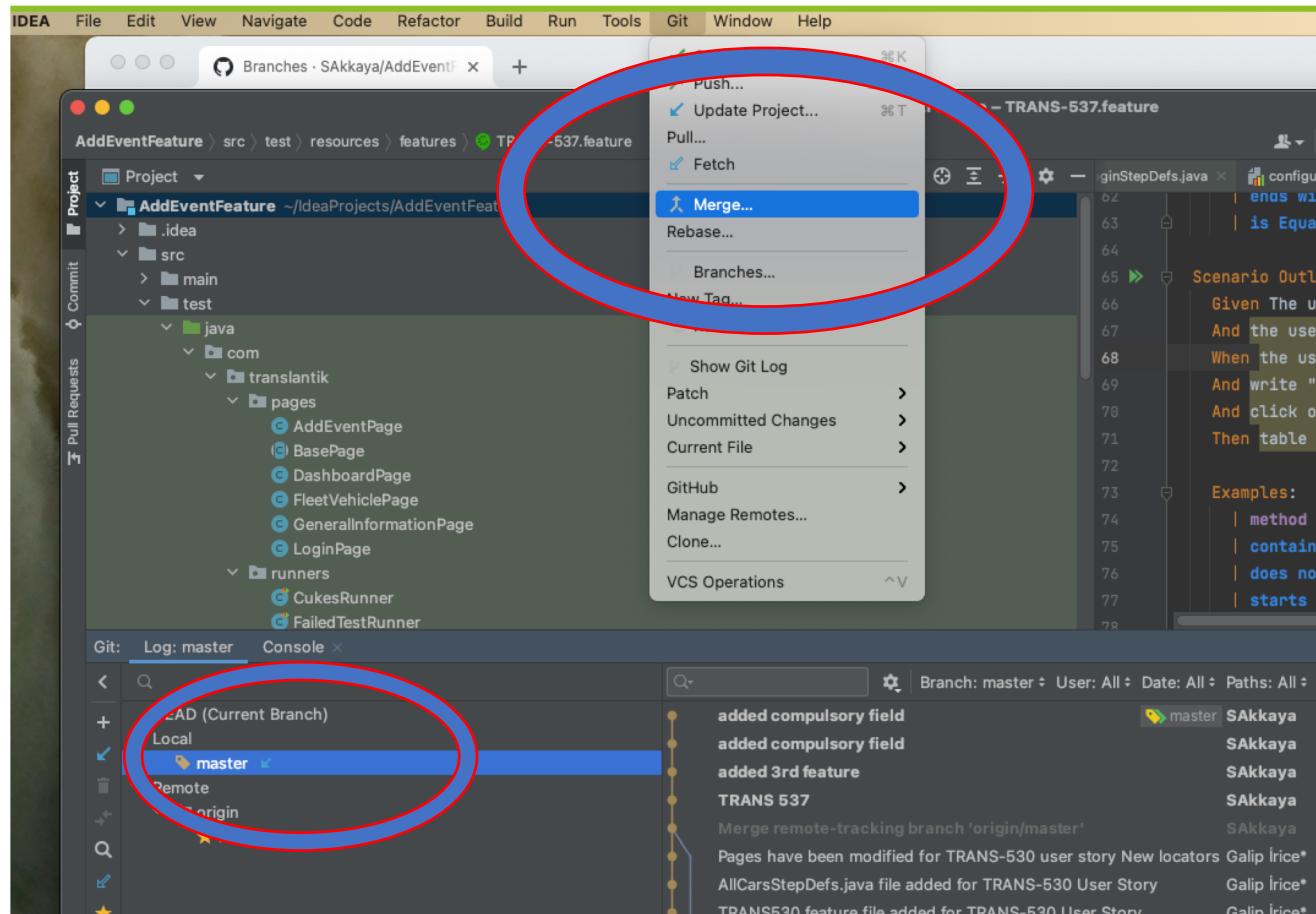

The screenshot shows an IntelliJ IDEA interface with the following details:

- Project View:** Shows the project structure with files like `AllCarsStepDefs.java`, `FleetVehiclePage.java`, and `LastOdometer.feature`.
- Code Editor:** Displays Java code for `FleetVehiclePage.java`. The code includes methods for interacting with a fleet vehicle page, such as `getColumnsFilterAll` and `methodFilter`.
- Git Tool Window:** Located at the bottom, it shows the local repository state:
 - Local:** Branch `master` is checked out.
 - Remote:** `origin` branch `master` is tracked.
- Toolbar:** At the top right, there is a "Git:" toolbar with several icons. One icon, which is a blue arrow pointing left, is circled in red.
- Bottom Status Bar:** Shows the commit message "TRANS 537" and the author "SAkkaya".

The screenshot shows a Java development environment with a dark theme. The top navigation bar includes 'File', 'Edit', 'Run', 'Tools', 'Help', and tabs for 'Git', 'Log: master', 'Console', and 'Update Info: 25.08.21, 18:07'. The left sidebar contains a file tree with packages like 'com.runner.runners' containing classes like 'CukesRunner' and 'FailedTestRunner', and other pages like 'LoginPage', 'GeneralInformationPage', 'FleetVehiclePage', and 'DashboardPage'. The main area displays a Git commit history for the 'master' branch. A red oval highlights the 'Local' section of the Git tool window, which shows the 'master' branch selected. Another red oval highlights the status message '4 files updated in 2 commits' at the bottom right of the commit list, which also includes a link 'View commits'.
